

## eLOCK eXpert

Clever!  
Securing premises electronically.  
Intelligently efficient.

# Your access to more convenient security

## Always seeing the big picture

Which employee has actually got which key and what room(s) does it cover? Sometimes, it's not always easy to answer these questions. And when premises have a change of use or when whole departments relocate within a building, then "key chaos" is guaranteed. eLOCK eXpert creates order out of this chaos. You programme your keys individually and can always see the big picture.

## Lost key? No problem

With a mechanical locking system, in the worst case scenario, if a key is lost and if you really want to be on the safe side, all cylinders in a locking system have to be replaced and all the people who use the system have to be supplied with new keys. This can get very expensive. With eLOCK eXpert, you can eliminate these costs. A lost transponder is simply blocked in the system and a new one is issued. All the other people who use the system can continue with their original cards.

## Control access individually

Ms Dawson only works half days, the delivery guy is only there after 3:00 pm, but not on Public holidays and the cleaning staff only come in Monday to Friday between 4:00 pm and 7:00 pm. Who can possibly keep tabs on all these different requirements? With eLOCK eXpert, it's child's play, because you can define the access rights and the access times for each transponder and for each door individually.

## Staff changes made simple and quick

When you choose the electronic locking system eLOCK eXpert, all the time-consuming work connected with administration of key logs and key cabinets becomes a thing of the past. If there are personnel changes, the transponders are simply deleted in the system and reconfigured and released for the new staff.

# The ideal solution

eLOCK eXpert, the electronic locking system with MIFARE® transponder technology and the efficient Access on Card locking concept, is the ideal solution for mid-sized and larger companies and hotels.

Contact us to find out for yourself about the many advantages.

# eLOCK eXpert

## Door components

### Cylinder

- ▶ Simple to install
- ▶ Cylinders tested for DIN EN 15684 compliance, for internal and external doors
- ▶ Versions available for emergency escape routes, with single- and double-sided authorisation checks and SKG approval
- ▶ Versions for profile cylinder locks and locks with Swiss round profile (RP22)
- ▶ Cylinder lengths can be retrospectively adjusted
- ▶ Three versions for the inside mechanical knob

Knob cylinder

Half-cylinder

### Comfort system

- ▶ Perfect combination of usability and design
- ▶ Comfortable operation
- ▶ Comfort system for glass doors with office or administrative lock classification
- ▶ Comfort system for interior timber doors
- ▶ APS Comfort system for timber and tubular frame doors; can be used for internal and external doors, fire protection doors, emergency exit routes

in Siedle housing

***“Very practical!  
I get my new access rights  
automatically when I book  
at the wall reader installed  
in the entrance area.”***

# for mid-sized and large companies

## Transponders

- ▶ 13.56 MHz RFID MIFARE® DESFire® transponders
- ▶ Access on Card: Locking rights are stored on the transponder
- ▶ No need to go to all doors to modify access authorisations
- ▶ Simple integration of existing transponders
- ▶ Transponders are programmed through a PC or decentrally through the wall readers
- ▶ Special functions, e.g. ticketing, fire service, office, day pass

Key fobs

ISO cards

## Programming options

- ▶ Flexible assignment of authorisations and time zones
- ▶ Logging of access movements
- ▶ Simple deletion and replacement of lost transponders
- ▶ Listing of all outstanding programming tasks in the To-Do menu
- ▶ Programming through NFC stick, To-Do card or wall reader
- ▶ Windows-based for installation on server, PC or tablet
- ▶ Different software options: Smart Office (Basic version), Office Plus, Multi User, Ticketing and Online licences
- ▶ Ideally suited for mid-sized to large premises and hotels
- ▶ Up to 65,000 doors
- ▶ Up to 250,000 transponders

***“Set-up of the eLOCK eXpert software is tailored to individual requirements and if required, it can be extended through additional functions.”***
